## Technician – Wind turbine & PV inspections

PARIS

### About the company

Greensolver is an independent technical service company focused on the wind and solar markets in Europe. From construction to operation, our mission is to maximize the return on investment for our customers through the quality of our services and our knowledge of investors' expectations.

We are market leaders in three fields:

- Operations: we perform Technical supervision and production optimization of wind and solar assets, as well as their administrative monitoring, financial and business. We perform this for financial investors across 5 countries currently
- Construction: we provide construction project management, owner's engineer and lender's engineer services
- Advisory: we perform for banks, investors and developer's various advisory services, technical due diligence, procurement advice, yield assessments...

### Job Description

Contract: permanent (CDI)

We are currently seeking a technician with at least 2 years of experience in inspecting or maintaining wind turbines.

As part of the company's technical team and working closely with stakeholders, the technician will:

- Organize and execute visual park (wind and solar) inspections and write visit reports
- Look for technical improvement solutions
- Ensure HSE plans signatures coordination: Drafting and organization of the signatures of the H&S plans
- Follow-up of the various working groups concerning safety within professional associations (SER, FEE, etc.)
- Provide technical monitoring of wind and solar installations during on-call service
- Coordinate the maintenance of HV electrical installations

The post will involve regular travel to production sites in France and also abroad.

Climbing wind turbines will be necessary. This post is therefore not recommended for people susceptible to dizziness or with cardiac problems.

On-call duty, covering one weekend out of eight, is to be expected (on-call by telephone, not requiring travel).

### **Qualifications / Experience**

Bachelor's degree in Electrical/Electrotechnical/Automatic Control and/or complemented by a renewable energy qualification.

Languages: French and English mandatory;

More than two years' experience in the REN sector and more specifically in wind turbine inspection/maintenance.

Good knowledge of the Pack Office.

Mandatory:

- Clean driving licence
- Working at height certification
- Electrical certification (minimum H0B0)

**Start date:** As soon as possible

**Location:** TBD but preferably in Paris

**Salary:** dependent on experience
